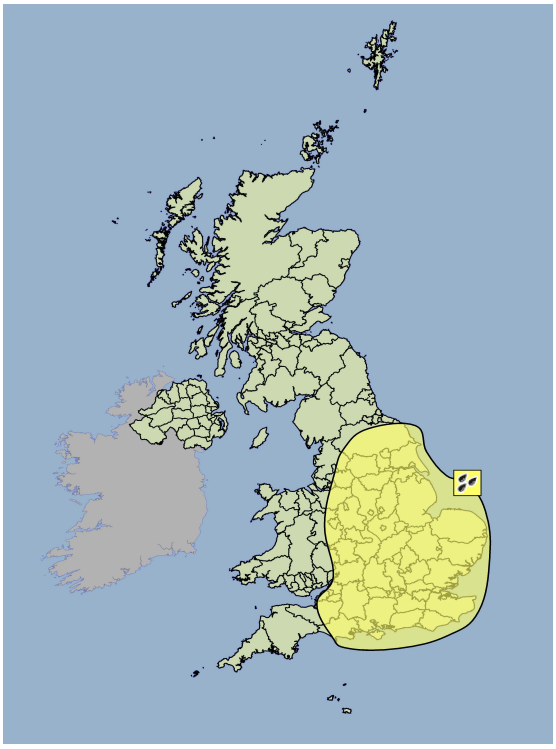
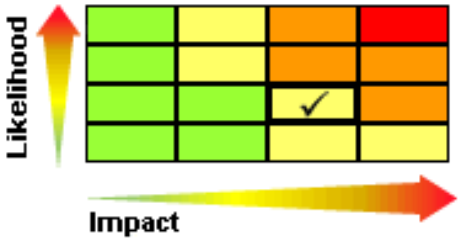
National Severe Weather Warning Service





Chief Forecasters Assessment
Areas of heavy showers and thunderstorms are expected to develop over France and then move northwards to affect many parts of England during the second half of Saturday and early on Sunday. Although there remains some uncertainty concerning the extent of these heavy showers and thunderstorms, there is an increasing signal for a band of heavy rain with isolated thunderstorms to move north to affect central southern England, the Midlands and then northern England. Some heavy thundery rain is also expected to affect SE England and East Anglia during Saturday afternoon and evening although the risk of severe thunderstorms extending north from France, giving frequent lightning, torrential rain and squally winds has reduced. Rainfall amounts will vary considerably, but there is again scope for 30 mm of rain to fall within an hour and 50 mm or more in less than 3 hours.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **11:50 on Sat, 27th Jul 2013** until **23:59 on Sat, 27th Jul 2013**

Areas of heavy, thundery rain are expected to move north from France during the course of Saturday afternoon and evening.

The public should be aware of the risk of localised disruption to travel due to surface water flooding.

This an update to the warning issued yesterday extending the warning further north.
